

A110

PURE & LÉGENDE

ALPINE

Inspired by Alpine's rich heritage, the A110 places driving pleasure front and centre. The mid-engined, two-seater sports car takes Alpine's core principles - agility, compact size and lightweight build - and deploys them with modern day expertise. In its element both on the racetrack and a winding mountain road, the A110 is still refined and effortless to use every day.

Exterior line

At its core, the Alpine A110 is a taut line drawn in a single stroke. It's a skin wrapped ever so tightly around powertrain, lowered seating and centre of gravity. The expansive curved rear screen, and side panels with accent lines, highlight the pronounced wheel arches.

Light signature

Inspired by the classic models of the Sixties and Seventies, the new A110 revives Alpine's distinctive four headlamp design, now with full LED technology as standard.

Strength and lightness

The A110 owes its remarkable agility and rewarding handling to its strong, yet very lightweight aluminium structure. A clean-sheet design, the body is bonded and riveted both to add strength and to reduce weight even further.

Less than 1100kg

Designed and engineered with an attentive eye for detail, the A110 weighs as little as 1080kg. Aluminium is used for the suspension components as well as the body, while Sabelt sports seats, weighing just 13.1kg each, help to keep weight down even further. As a result, the A110 is agile and engaging at all speeds.

A110 PURE

Alpine's essence

Exterior

Standard equipments

- Aluminium body and chassis
- Flat underbody and diffuser
- 4 LED front headlamps
- LED tail lights with dynamic indicators, brake light and reversing light
- French flag on C-pillars

Main options

- Active sport exhaust system
- Front and rear parking sensors with rear parking camera

LOTUS

MA-028-TH

Wheels

Standard equipment

- 17" ten-spoke alloy wheels

Options

- 18" Grey diamond turned "Sérac" alloy wheels
- 18" Forged "Fuchs" alloy wheels

17" ten-spoke alloy wheels

**18" Grey diamond turned
"Sérac" alloy wheels**

18" Forged "Fuchs" alloy wheels

Interior

Standard equipments

- Driving mode selector: 3 driving modes (Normal / Sport / Track)
- Lightweight Sabelt bucket seats
- Black leather / microfiber interior
- Matt carbon fibre finish on centre console, air vents and instrument panel visor
- Multimedia system with 7" touchscreen

Main options

- Aluminium pedals and passenger footrest
- Six-way Comfort seats
- Focal audio system
- Focal premium audio system
- Steering wheel with Bleu Alpine logo in centre

Seats

Standard equipment

- Bucket seats lightweight Sabelt design in leather and microfibre upholstery 13.1 kg

Options

- Six-way Comfort seats
- Heated six-way Comfort seats

Technical elements

Dimensions

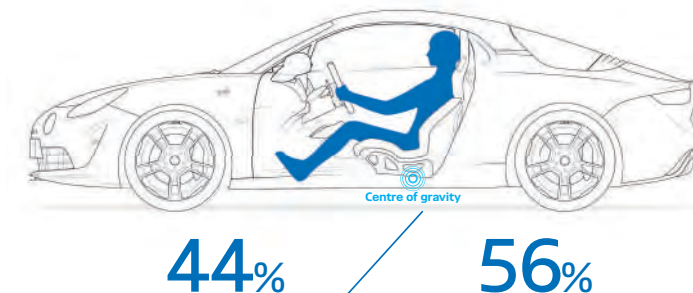

Engine performance

185 kW – 320Nm

Weight distribution

Technical specifications

ENGINE

Number of cylinders	4
Number of valves per cylinder	4
Displacement	1,798 cc
Maximum engine power	252 hp (185 kW)
Fuel	Petrol
Maximum torque	320 Nm

TRANSMISSION

Transmission type	Rear-wheel drive
Dual clutch automatic gearbox	7 speeds

CHASSIS

Chassis	Aluminium frame (96%): safety cell, engine mount, front end
Front/Rear axle	Double-wishbone suspension system
Body type	Coupe
Turning circle between kerbs/walls	11.64 m/11.74 m
Brakes	Compact, anthracite aluminium brake calipers with integrated parking brake
Front brake disc diameter	296 mm
Rear brake disc diameter	296 mm
Front tyres (Pure - Légende)	205/45 R17 - 205/40 R18
Rear tyres (Pure - Légende)	235/45 R17 - 235/40 R18

WEIGHT

Min. Kerb weight (Pure - Légende)	1,098 - 1,123 kg
Gross vehicle mass	1,365 kg

PERFORMANCE

Maximum speed	250 km/h
0-100 km/h	4.5 s
400 metres	12.7 s
1,000 metres	23.2 s

FUEL EFFICIENCY/EMISSIONS*

CO ₂	144 g/km
Urban cycle	8.7 l/100 km
Extra-urban cycle	5.1 l/100 km
Combined cycle	6.4 l/100 km
Emission standard	Euro 6
Homologation procedure	WLTP

DIMENSIONS

Length	4,180 mm
Wheelbase	2,420 mm
Width	1,798 mm
Max. width with door mirrors unfolded	1,980 mm
Height	1,252 mm

* Provisional data subject to official homologation. The indicated values were determined according to the prescribed measurement method. These are the 'NEDC CO₂ values' according to Worldwide Harmonised Light Vehicle Test Procedure (WLTP).

Figures are produced for comparison purposes in accordance with European legislation and may not reflect real life driving results. Equivalent NEDC value obtained from WLTP figures, aiming to reflect a closer representation of the 'real-world' fuel consumption and CO₂ figures. Real world fuel (actual) consumption can vary as the fuel efficiency is influenced by driving behaviour, weather and road conditions. The use of technical equipment for example air conditioning, can also effect the fuel consumption. For further information, please visit the Vehicle Certification Agency web site www.vca.gov.uk
