Malibu. Dependability You Can Believe In.

Since its introduction just four short years ago, the award-winning Chevy Malibu has found its way into hundreds of thousands of driveways and garages across America.* People depend on Malibu performance, quality, spaciousness and comfort.

For 2001, Malibu offers a complete package of standard features — including a proven 3100 V6, automatic transmission, air conditioning and four-wheel antilock brakes.

And, best of all, Malibu offers dependability you can believe in, with a rust-fighting body, a proven powertrain and impressively long intervals between scheduled maintenance.† If you're looking for a car that will go the distance, look into Malibu.

“My Malibu? Absolutely superb! I’ve had just the regular maintenance, including tire rotations and one new set of tires. I love the V6 power, and after all the miles I’ve put on this car, its handling is still nice and tight.”

—Jason Hansen, Fenton, Mo., 1998 Malibu LS owner, 114,000-plus miles

*Based on 2000 model year competitive information.

Malibu's standard 170-hp 3100 V6 engine combines with an electronically controlled, four-speed automatic transmission to deliver abundant power for passing or merging into traffic. This V6 also sips gas like a four-cylinder. (EPA estimated MPG 20 city, 29 highway.)

Malibu's standard four-wheel antilock brake system (ABS) helps reduce wheel lockup and helps you to maintain steering control while braking, even on most slippery surfaces.

“For the fourth year in a row, the Malibu cruises to the top of the \$13,000 — \$18,000 class with a solid ride and a spirited 170-horsepower V6.”

— Kiplinger's 2000 New Cars & Trucks Buyer's Guide

Malibu's Standard Safety/Security Package Gives You That Confident Feeling.

The standard safety package in the 2001 Chevy Malibu is both advanced and comprehensive. It includes a high-strength steel safety cage around the passenger compartment, plus energy-absorbing front and rear crush zones.

Malibu also has dual air bags and a four-wheel antilock brake system (ABS). For added safety during daylight hours, Daytime Running Lamps come on automatically at a reduced intensity to make your Malibu more visible to drivers of oncoming vehicles.

Every time you get into your new Malibu, you'll feel confident and secure with this comprehensive safety package surrounding you.

A NOTE ON CHILD SAFETY:

Always use safety belts and proper child restraints, even with air bags. Children are safer when properly secured in a rear seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active air bag. See your vehicle Owner's Manual and child safety seat instructions for more safety information.

STANDARD FEATURES:

A Standard Child Security Package.

This five-feature package (1) locates the fold-down seat* latch in the trunk, rather than inside the passenger compartment, so a child can't fold down the rear seat and get into the trunk; (2) requires the ignition to be on before the trunk release button in the car will function; (3) allows you to lock out the rear power window switches;* (4) provides top-tether anchors in the area behind each rear-seat position to better secure child restraint safety seats with top-tether straps; and (5) provides outboard rear safety belts which cinch for secure installation of child safety seats.

NOTE: A glow-in-the-dark trunk-lid release lever located inside the trunk compartment as a dealer-installed option can help keep children from locking themselves inside the trunk. Included in this option are a child-resistant outside trunk latch that requires presetting and a lockout strap positioned across the trunk pass-through. *If your Malibu is so equipped.

Standard Four-Wheel Antilock Brakes

ABS is standard in every 2001 Chevy Malibu. You'd pay hundreds of dollars for an ABS option in many other midsize cars.*

*Based on 2000 model year competitive information and GM Mid-Sedan segment.

Standard Top-Tether Anchors For Child Restraint Safety Seats

Easy-to-use top-tether anchors located in the area behind the rear seat help you better secure a child restraint safety seat in all three rear-seat positions.

Standard Steel Safety Cage

A high-strength steel safety cage with reinforcements in the floor and body sills, roof and pillars, plus steel side-door beams, surrounds the Malibu passenger compartment.

Standard Energy-Absorbing Design

In collisions, the front and rear structures are designed to help absorb energy in a controlled manner to help maintain the integrity of the Malibu passenger compartment.

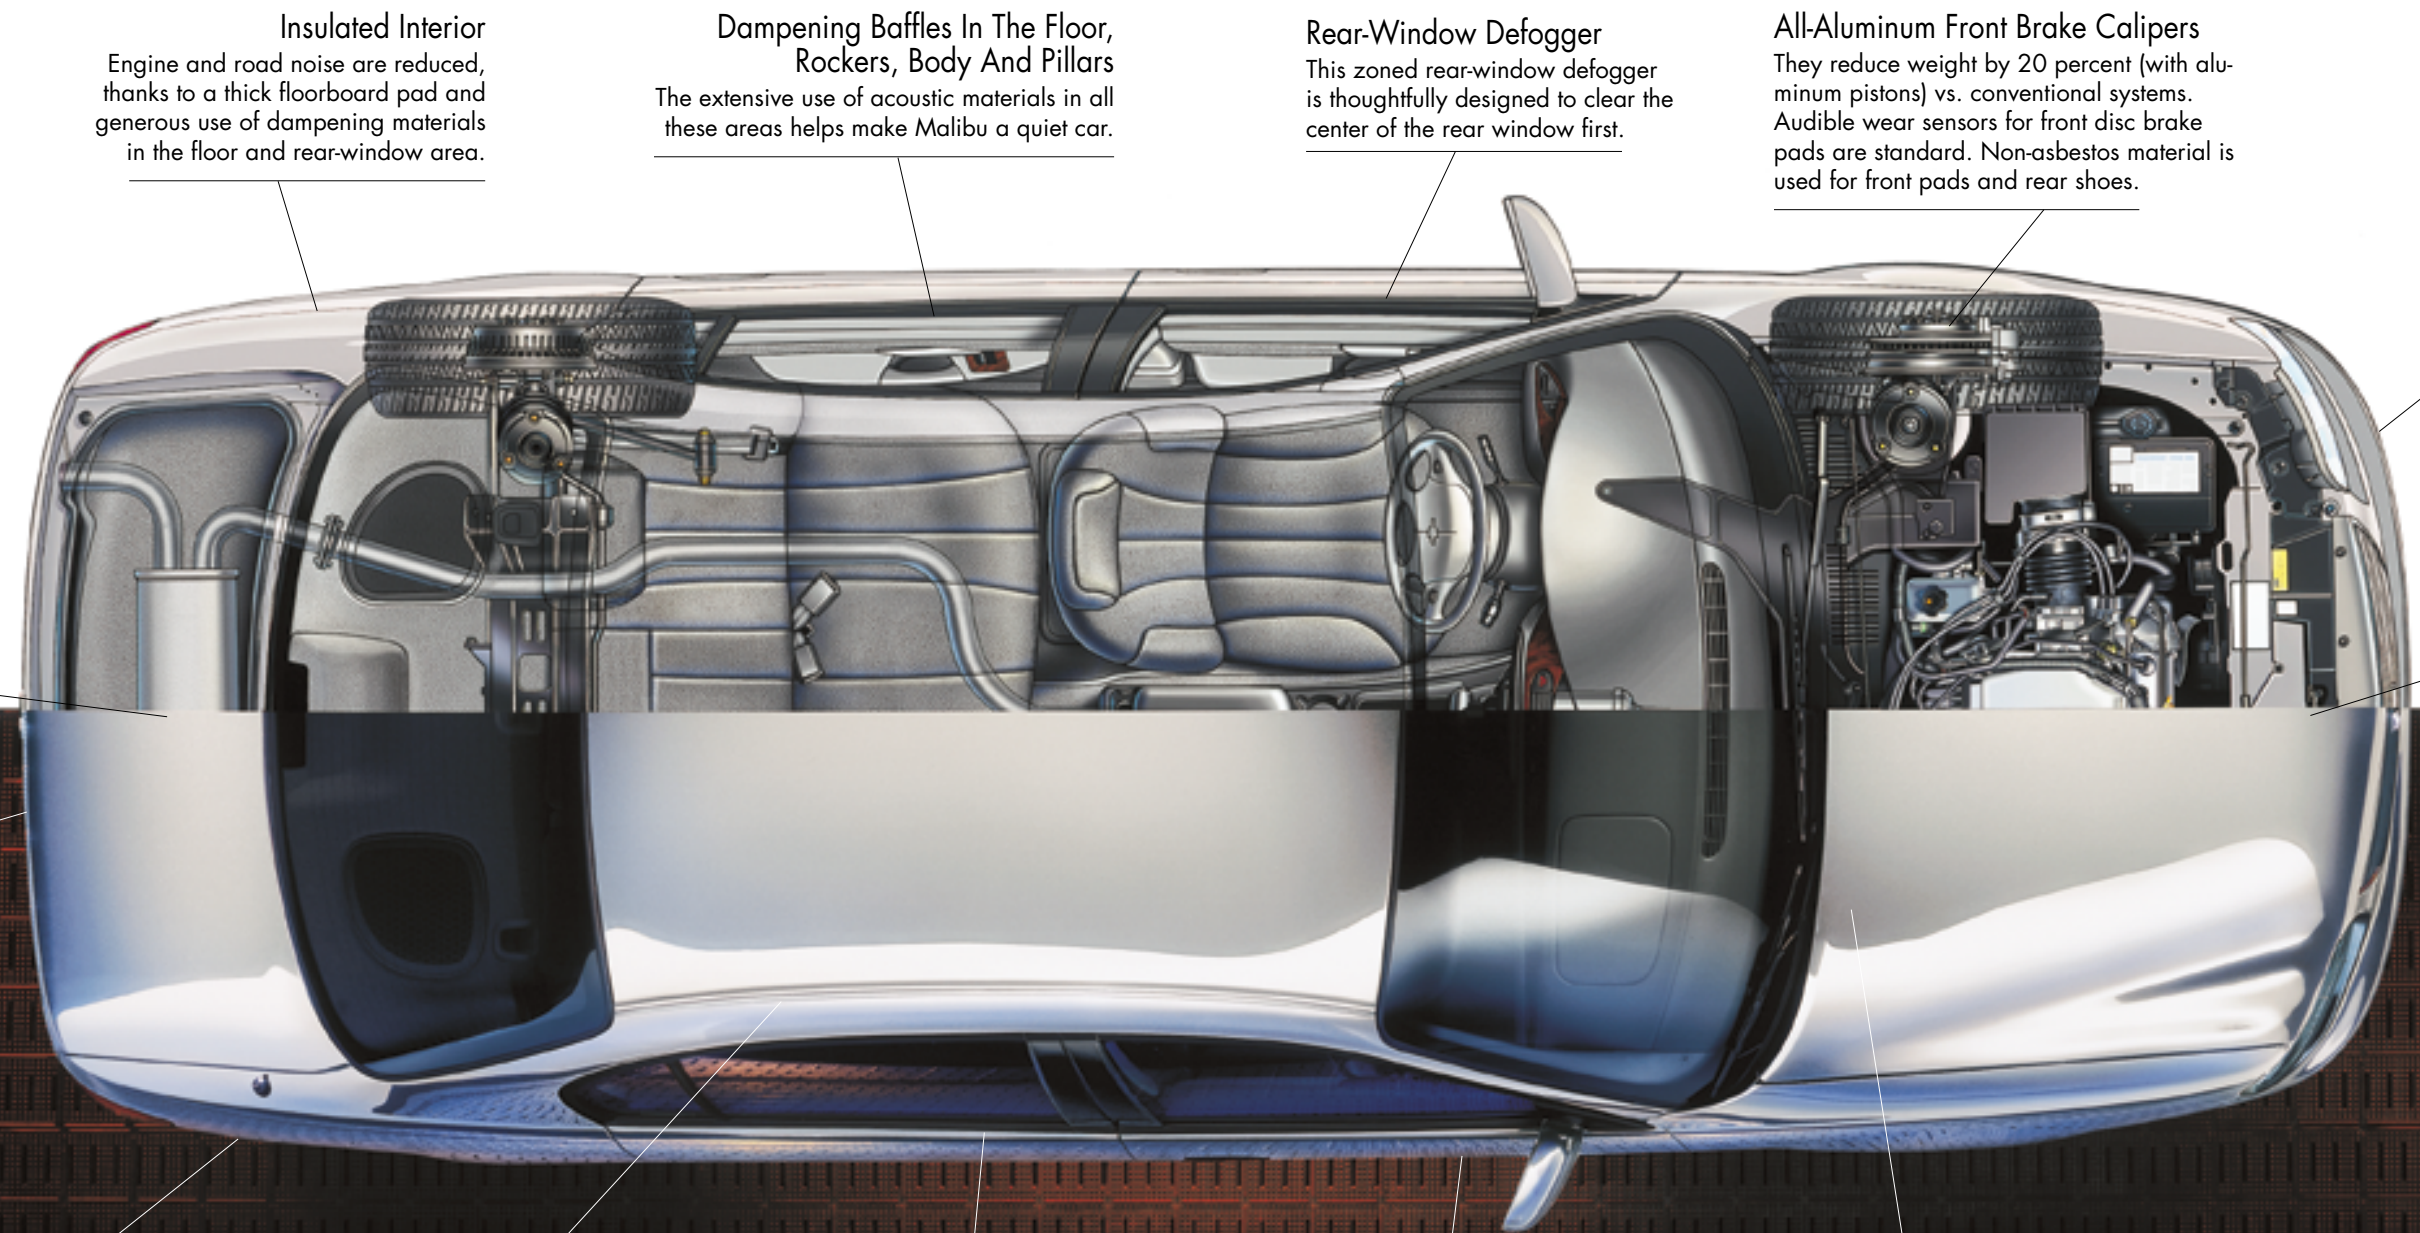

"I rate Malibu high for safety engineering. I especially like the ABS, because rural roads where we live are not that great. My wife and I feel safer with V6 power, too."

— Bruno Meyer, Rhinelander, Wis., 1998 Malibu LS owner

All Around You—A Quality Package.

Insulated Interior
Engine and road noise are reduced, thanks to a thick floorboard pad and generous use of dampening materials in the floor and rear-window area.

Dampening Baffles In The Floor, Rockers, Body And Pillars
The extensive use of acoustic materials in all these areas helps make Malibu a quiet car.

Rear-Window Defogger
This zoned rear-window defogger is thoughtfully designed to clear the center of the rear window first.

All-Aluminum Front Brake Calipers
They reduce weight by 20 percent (with aluminum pistons) vs. conventional systems. Audible wear sensors for front disc brake pads are standard. Non-asbestos material is used for front pads and rear shoes.

Galvanized-Steel Body
Malibu body panels are made of two-sided galvanized steel for excellent protection against corrosion. The zinc coating helps prevent exterior surface rust due to minor chips and scratches, and helps prevent holes which could start from the inside.

Stainless-Steel Exhaust System
The muffler and tailpipe are made of aluminized stainless steel — and the take-down pipe, extension pipe and catalytic converter shell are made of stainless steel — providing excellent corrosion protection for the entire exhaust system.

Liquid-Filled Engine Mounts
The Malibu engine floats on hydraulic mounts. This system actually tunes certain engine noises to levels inaudible to the human ear.

A Quality Paint Process
Body panels are made of two-sided galvanized steel and “heal” themselves when scratched. They get a phosphate coating and rust-fighting primer, topped by a glass-smooth primer surfacer. After the basecoat goes on, a clearcoat provides a durable shine.

Noise-Reducing Steering Gear
Malibu has isolated inner tie rods that reduce the transfer of road noise and vibration into the passenger compartment.

Frame-Under-Glass Door Design
This design contributes to reduced wind noise at highway speeds. A specially designed radio antenna and sculpted mirrors add to a quiet ride.

Integral Rain Gutter
A “roof ditch molding” is designed to help keep you dry when you enter or exit your Malibu on rainy days.

Solar-Ray Tinted Glass
The windshield and rear window are made of Solar-Ray tinted glass, which helps decrease the sun’s glare inside the car.

Front Chassis Frame
The front chassis frame design helps deliver a pleasing, responsive driving experience while contributing to occupant safety. It is a robust, structurally rigid design.

Recessed Windshield Wipers
The windshield wipers “park” well below the airstream, which helps reduce wind noise caused by air turbulence at highway speeds.

No Timing Adjustments — Ever
A direct ignition system eliminates the need for periodic engine timing adjustments.*

*Maintenance needs vary with different uses and driving conditions. See the Owner’s Manual for more information.

STANDARD FEATURES:

Malibu's Design Package Makes Life Easier.

The Malibu style is smooth, aerodynamic and contemporary. Malibu is also designed to look great for years to come, with rust-fighting, two-sided galvanized-steel body panels, energy-absorbing, scuff-resistant bumpers and resilient body-side moldings.

Other ways Malibu is designed to make life easier include extended-life engine coolant with a scheduled replacement interval of up to five years or 150,000 miles* (whichever comes first) and transmission fluid that should never need changing under normal driving conditions.* You can even travel up to 100,000 miles before the first scheduled spark plug replacement.*

Malibu is sized just right on the outside and the inside. No wonder this car is so popular in so many neighborhoods.

Malibu's new RDS-capable audio system has technology that allows you to receive a wide variety of information, including a radio station's format (e.g., rock, jazz, talk), text messages, and important traffic alerts or weather bulletins. This new stereo also retains power for 10 minutes after you turn off the ignition or until a door is opened, to let you finish listening to a newscast or favorite song. What's more, the key fob that activates your Remote Keyless Entry system can be programmed to reset the station preferences of two different drivers while the car is being unlocked.

“I'm very pleased with the instrument panel design. The panel's easy to read, and all knobs, switches and buttons are easy to reach — and I love my 'leftie' cup holder. The glove box is deep. The stereo has both cassette and CD players and crystal-clear reception, and I love the pop-in/pop-out treble and bass buttons.”
