PERFORMANCE

TURBOCHARGE YOUR DAILY COMMUTE.

Trax LT in Brilliant Blue Metallic with available features.

TURBOCHARGED PERFORMANCE. Trax has the power to merge with a 138-horsepower ECOTEC® 1.4L turbocharged engine. An electronically controlled 6-speed automatic transmission with Driver Shift Control is also standard on every 2015 Trax.

OUTSTANDING FUEL ECONOMY. Robust responsiveness isn't the only benefit of the ECOTEC 1.4L turbocharged engine. Featuring the advanced technology of Variable Valve Timing, Trax offers an EPA-estimated 34 MPG on the highway.

ON-DEMAND ALL-WHEEL DRIVE. Available on-demand all-wheel drive (AWD) automatically adapts to provide extra traction and maneuverability in rain, snow or other challenging conditions. When AWD isn't needed, an intelligent AWD system automatically shifts into front-wheel drive for maximum efficiency.

34 MPG¹ / **138** HP / **148** LB.-FT. TORQUE
HWY

A VERY WISE USE OF POWER.

The 1.4L ECOTEC engine delivers the power and torque of a larger-displacement engine with the efficiency of a smaller one.

With an EPA-estimated 34 MPG on the highway, you'll go farther on less.

Variable Valve Timing adjusts intake and exhaust valves in the engine to help improve power and increase fuel economy.

SAFETY

Trax LTZ in Satin Steel Metallic.

¹ Air bag inflation can cause severe injury or death to anyone too close to the air bag when it deploys. Be sure every occupant is properly restrained. Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger air bag. See the Owner's Manual and the child safety seat instructions for more safety information. ² Based on GM Crossover segment. ³ Visit onstar.com for details and system limitations. OnStar acts as a link to existing emergency service providers. Not all vehicles may transmit all crash data.

YOUR SECURITY ZONE. Some of the most important Trax features are the ones you can't see. For enhanced protection, high-strength steel forms a rigid structure around the passenger compartment.

10 STANDARD AIR BAGS.¹ That's more standard air bags than any other competitor in this class.²

Every Trax includes dual-stage frontal and knee air bags for driver and front passenger, head-curtain side-impact air bags for front and rear outboard passengers, and front and rear seat-mounted side air bags.

ONSTAR AUTOMATIC CRASH RESPONSE.³ In a crash, built-in sensors can automatically alert a specially trained OnStar Advisor, who is

immediately connected into your Trax to see if you need help — even if you can't ask for it. Advisors can use GPS technology to pinpoint your exact location and request emergency help. OnStar is standard for six months.

STABILITRAK ELECTRONIC STABILITY CONTROL. This standard system automatically adapts to the environment to help you stay

on course in challenging weather and road conditions.

HILL START ASSIST. By holding the vehicle stationary for up to two seconds after the brake is released, Hill Start Assist gives you time to accelerate before rolling backward. This comes in handy when parking on city streets or driveways with especially steep inclines.
