Since it's powered by a combination of gas and electricity, **Fusion Hybrid** will need to be refueled, just like a gas-engine model. The difference is, you may visit gas stations less frequently. That's because, as you drive your Fusion Hybrid, the 2.0L Atkinson-cycle gas engine, electric motor and Regenerative Braking System are seamlessly interacting behind the scenes to help maximize fuel efficiency and recharge the battery. For instant feedback on how your driving style is affecting efficiency, just view the "Efficiency Leaves" screen on the SmartGauge® with EcoGuide instrument cluster. Drive more efficiently, and you'll see more leaves grow.

# PLUG IN FOR BETTER DRIVING RANGE

**Fusion Energi** is a Plug-In Hybrid, which means you have the option to plug it in when you want to charge up the electric battery and help maximize the distance it can travel in electric-only mode. The 2019 Fusion Energi has an EPA-estimated all-electric driving range of 26 miles<sup>1</sup> – that’s nearly 20 percent farther than last year’s model – and an EPA-estimated total driving range of 610 miles!<sup>1</sup>

If you choose to plug in your Fusion Energi, you can do it at home, work, or even out shopping. It’s simple and convenient. At home, you can just insert the standard 120V convenience charge cord into an electrical outlet and into the vehicle’s charge port, which illuminates in sections as it charges. You can also use a Ford recommended AeroVironment™ 240V home charging station<sup>2</sup> to recharge in about 2.5 hours.

The MyFord® Mobile app<sup>3</sup> and website (myfordmobile.com) make it easy to monitor and schedule charging. They also offer a charging station locator powered by PlugShare.® As you drive, Fusion Energi functions very similarly to its Hybrid sibling. So even if you choose not to plug it in, you’ll still enjoy the benefits of Hybrid driving.

THE TOOLS TO  
**RULE THE ROAD**

Fusion is designed to deliver a smooth and seamless driving experience – road after winding road. To get moving, just turn the rotary gear shift dial and go. EcoBoost® models feature an “S” button on top that you can tap to engage Sport mode. It sharpens throttle response, allows for a more dynamic engine note inside the cabin, more aggressively programs the transmission shift points, and more.

**For poise through the turns,** Torque Vectoring Control<sup>1</sup> increases vehicle stability by applying slight braking force to the inside wheel as needed, delivering more torque to the outside wheel to help Fusion stay firmly planted.

Standard:    All models

**For smooth, responsive handling,** continuously controlled damping (CCD) adjusts – every 2 milliseconds – based on information provided by 12 different sensors that read the road and vehicle inputs. The system can even detect potholes, adjusting shock absorbers so impact severity is reduced.

Standard:  V6 Sport

**To help maximize traction at all times,** Fusion offers fully automatic all-wheel drive (AWD). The system constantly monitors traction, transferring power between the front and rear wheels as needed, typically before wheelslip can even occur, to effortlessly improve your handling experience.

# INTRODUCING OUR NEW STANDARD FORD CO-PILOT360™

## FORD CO-PILOT360

Our world is increasingly distracted. A few seconds is all it takes... to lose focus. According to the National Highway Traffic Safety Administration (NHTSA),<sup>1</sup> 94% of serious crashes are due to human error. To help you drive confidently so you can better enjoy your journey, the 2019 Fusion comes with Ford Co-Pilot360. This suite of 5 standard features can start helping the moment you begin backing out of your driveway.

Standard: All models

**Rear view camera<sup>2</sup>** shows you what's behind Fusion as you slowly back up by displaying a full-color image on the LCD screen<sup>3</sup> in the center of your instrument panel.

**Lane-Keeping System<sup>2,5</sup>** alerts you with steering wheel vibration if it detects you drifting out of your lane, and can even apply steering wheel torque to help direct you to return to your lane.

**BLIS® (Blind Spot Information System) with cross-traffic alert<sup>2</sup>** warns you if it detects a vehicle in either of your blind spots while attempting to change lanes, or approaching from either side while in Reverse.

**Auto high-beam headlamps<sup>2</sup>** can help detect vehicles and street lights ahead of you, automatically switching between low and high beams as a convenience to you, and a courtesy to other motorists.

**Pre-Collision Assist with Automatic Emergency Braking<sup>2,4</sup>** can automatically apply the brakes to help reduce the severity of, and in some cases potentially eliminate, a frontal collision with a vehicle traveling in the same direction, or a pedestrian detected ahead.

## FORD CO-PILOT360 ASSIST™

When your Fusion is equipped with Ford Co-Pilot360 Assist,<sup>6</sup> you'll benefit from these additional technologies.<sup>2</sup>

Standard: SE, SEL Titanium V6 Sport

Available: S, SE, SEL

**Adaptive cruise control with stop-and-go** can bring your vehicle to a complete stop when traffic slows, and can accelerate back to its preset speed within 3 seconds of stopping.<sup>7</sup>

**Voice-activated navigation with SiriusXM® Traffic and Travel Link<sup>®8</sup>** can alert you to traffic backups along your intended route and offer alternatives to help you stay on schedule by avoiding them altogether.

Available equipment.** <sup>1</sup>Information about crash-avoidance technologies as part of the Government 5-Star Safety Ratings program can be found at [www.SaferCar.gov](http://www.SaferCar.gov). <sup>2</sup>Driver-assist features are supplemental and do not replace the driver's attention, judgment and need to control the vehicle. <sup>3</sup>Fusion Titanium shown. <sup>4</sup>Pre-Collision Assist with Automatic Emergency Braking can detect pedestrians, but not in all conditions and does not replace safe driving. Please see owner's manual for system limitations. <sup>5</sup>Lane-Keeping System does not control steering. <sup>6</sup>Available feature. <sup>7</sup>If stop is longer than 3 seconds, driver must intervene and press "RES" button or accelerator pedal to resume system operation. <sup>8</sup>Certain restrictions, 3rd-party terms and data rates may apply. In other words, pure exhilaration. V6 Sport also features the new Ford Co-Pilot360<sup>™</sup> and Ford Co-Pilot360 Assist<sup>™</sup> technologies, plus enhanced active park assist.
